Practice Problem

Input file: practiceproblem.dat

Let's play a game! Given the name of a game, print "Let's play ____!" to the screen.

Input:

The first line will contain the number of lines to follow. Each of the following lines will contain the name of a game.

Output:

For each game, output "Let's play ____!", where the blank is replaced by the name of the game. Each output should be on its own line.

Example Input:
```
3
Checkers
Hide and Go Seek
Battleship
```

Example Output:
```
Let's play Checkers!
Let's play Hide and Go Seek!
Let's play Battleship!
```
